

## Summer 2020 Professor Testimonials

### Dr. Xue “Snow” Xu - Mississippi State University

*“Some of my top students recommended Clutch Prep to me last year. Finally, this summer, I had the chance to use their products as homework for my Orgo I course. Students gave highly positive feedback.*

*The parts I like the most about Clutch Prep are:*

- *Clutch Prep has up to 5000 problems prepared for organic chemistry. Each problem has a video explanation.*
- *Problems are divided into topics.*
- *Each problem contains additional practice sessions (extra videos), if students want another practice on the same topic, they can use additional practice sessions.*
- *There are concept videos which give an alternative way to explain course materials.*
- *Quick responses of students’ questions and faculties’ concerns.*
- *Text reminder on homework due date and exam date.*

*There is another function that I am interested but I have not tested yet:*

- *A tutor will be assigned to your class. The tutor can support your class such as leading the class/homework discussion on “Group Me”.*

*Overall, I think it is very useful, especially during this pandemic time.”*

---

### Dr. Ali Hina - University of the Pacific

*“It was a very challenging time for both instructors and students when COVID-19 hit. I immediately started searching for an online platform to help my students with their homework and provide them with an online tool to make online learning easy and accessible.*

*I did not have a good experience with other online platforms. However, I was attracted to an online platform called Clutch Prep. It was founded by two young professionals who have a deep passion for student education and online learning. I have used Clutch Prep for two chemistry courses and I am using it for my third Chemistry 2020 class.*

- *What I love about the platform is their very robust customer service, the IT team is very knowledgeable and quick to respond to any issues.*
- *Clutch Prep has developed a product and a learning model that is very simple, consisting of concepts, examples, and practice.*
- *Clutch Prep product is built using a video-based curriculum and is designed for both strong students (with large pools of practice problems) and those that need a lot of help (easy access to instructors).*
- *Their content is very extensive, covering all college science subjects (chemistry, math, physics, etc.).*
- *Clutch videos are very well designed in terms of content and time, and instructor interaction with the online audience.*
- *Unlike big, large corporations, Clutch Prep is very flexible and open to continuous improvements of their models and products.*
- *Finally, by offering my students ClutchPrep resources, they have increased their knowledge of the material and improved their grades.”*
